REFORM

10. Arora, Dolly

Independent regulatory authorities: contours of the debate and experience

INDIAN JOURNAL OF PUBLIC ADMINISTRATION, 64(3), 2018 (September): 358-372

This article focuses on the rapid growth of independent regulatory authorities and emerging evidence of significant variation in their design features as well as functional expression of independence across nations within nation sectors and levels of governments, this article argues that regulatory discourses, including their imitational design and functionally, need to be understood in their specific political economy context and in the framework of larger goals of social justice and sustainable development, taking care of accountability, equity and environmental concerns that invite urgent attention. This would require a reopening debate on the parameters for evaluation of regulatory goals.

** REFORM; REGULATORY STATE; PUBLIC ADMINISTRATION.
